No. : (02632) 243833.

Book Review

Herbal Drugs and Phytopharmaceuticals

A Handbook for Practice on a Scientific Basis

New Edition edited by Prof. Em. Dr. Max Wichtl, Vienna, Austria

Translated from the fourth German edition by Josef A Brinckmann, Sebastopol/California, USA, and Michael P Lindenmaier, Eugene/Oregon, USA.

Medicinal teas and extracts

An enormous increase in the knowledge of herbal drug constituents, their effects and side effects has occurred in recent years. As a result, many herbal products are undergoing a transition from classic herbal teas to standardized extracts. The new edition of Wichtl's internationally renowned book takes the advances made in medicinal plant research and phytotherapy fully into account; the information is reliable, highly pertinent and authoritative!

*Now containing 210 drug monographs, 30 of which have been newly introduced.

*With added phytopharmaceutical information such as type of extraction solvent, drug-to-extract ratio and dosage recommendations for extracts.

*New information on Canadian, UK and US regulatory status.

*Over 1000 new literature references, including Oriental Medicine applications.

Wichtl's standard reference offers comprehensive information about the origin, constituents, effects, indications, and dosage of herbal drugs, phytopharmaceuticals, testing and adulteration. Serving as a practical guide for herbal industry professionals, medical herbalists, pharmacists, naturopathic physicians and medical doctors, it is also an essential companion for students of pharmacy, food science and naturopathic medicine.
