This is a state of the art masterpiece by a clinician par excellence. It is a world-class compendium of some latest articles in hemato-oncology, which will useful not only to hematologist, pathologist but also to general physicians. It is a multiauthor (74 to be precise) textbook with blend of academia and Practitioners as well as international authorities across the globe. Each chapter has a succinct abstract, selected reading, illustration in colour and “Carry Home Message”. The sections are Anemia, Haemostatic and Thrombotic Disorders, Acute Leukemia and MDS, Chronic Leukemia, Lymphoma, Plasma cell dyscrasia, Transfusion medicine and Transplantation, Support Therapy, Laboratory Science, etc. The whole book is hardbound and printed on quality art paper with colour illustrations. This is a must for every physician’s library.
